## **Still need MANY MORE parents, staff & community to take surveys!**

**Huntington** – Gateway’s communications survey will remain open an extra week in order to get input from more parents, staff and community members. As of May 15 (the original end day), only 8 community members, 59 parents, and 73 staff members had completed the anonymous, online survey. In order to obtain reliable results, we need at least 99 community members, 271 parents and 149 staff members to take the survey.

Participation is completely anonymous and if you have already taken the survey, we thank you! If you haven’t yet, please do so by Monday, May 22.

Links to all 3 surveys are on the Gateway homepage ([www.grsd.org](http://www.grsd.org)). The parent and community survey links will also be posted on social media and the staff survey link has been emailed out to all staff several times.

In their review of Gateway operations, the team from the Massachusetts Association of Regional Schools (MARS) recommended a survey on communications efforts to look at where communications efforts are working, where they are not, and what to do about it.

SCoPE (School Communication Professional Evaluation) was created by accredited leaders in school communication and is an exclusive partner with the National School Public Relations Association. The survey aligns with NSPRA’s Rubrics of Practice and Suggested Measures.

Please take a few minutes to complete whichever survey category you fall into!
