Parents reminded of Gateway's "Mobile App"

Huntington – The Gateway Regional School District is pleased to announce their new mobile APP, available free of charge in iPhone and Android formats.

The App may be downloaded for free from the Google Play (Android) or App Store (iPhone) by searching for Gateway Regional School District. It includes news, events, the lunch menu, the school year calendar, sports schedule and a staff directory.

The App also features "push notifications", which may be used when school is closing early due to bad weather, and similar events. These will display on the mobile devices of people who have downloaded the App.

"From the questions I receive or see from families, I know the App can be really helpful for people who want to quickly find information," said Wendy Long, Communications Specialist for the district. "It is also the quickest way for us to get notifications out to parents, guardians and staff."

Long added that the Communications Council—a group comprised of parents, staff, school committee members and administration—welcomes feedback from students, staff, families, community members and alumni about how the app is working, and any additional things they'd like to see. Please contact Long (685-1003 or wlong@grsd.org) if you have comments or suggestions.
